## Company Overview

Fortune 500 organizations use the BlockApps STRATO platform to create and manage **programmable business networks**.

## STRATO Blockchain Solution

STRATO is used to build **industry-owned, extensible business networks** that serve as the transactional and collaboration **backbone for end-to-end business processes** while enhancing security, performance, trust, and transparency in the business value chain.

Business networks expand as **new products, standards, services, and partners are integrated** and connected to them.
