

## BlockApps

### Junior DevOps Engineer

#### Company Overview

BlockApps is an enterprise blockchain company that develops industry applications on our own blockchain platform, STRATO, to enable traceability across enterprise value chains. Our customers include Fortune 500 companies such as Bayer Crop Science (the world's largest seed company), Blockchain for Energy (a consortium of the world's largest energy companies including Repsol, Chevron, ExxonMobil, Schlumberger and more), and the U.S. government. BlockApps has launched several industry initiatives, including TraceHarvest (agribusiness traceability), TraceCarbon (sustainability tracking), and the Enterprise Ethereum Alliance (world's largest open standards blockchain organization). For more information, visit and contact us at [www.blockapps.net](http://www.blockapps.net), or find us on social media via [LinkedIn](#), [YouTube](#) and [Twitter](#).

#### Job Description

BlockApps is looking for a **Junior DevOps Engineer** to support the day-to-day operations of our DevOps and Customer Support teams. You must possess a deep understanding of various DevOps development tools and technologies. This position requires hands-on technical know-how plus a proven ability to collaborate with others.

#### Roles & Responsibilities

- Help design, build and manage the CI/CD infrastructure, test automation frameworks for build validation and tools for infrastructure provisioning
- Help manage and maintain the tech infrastructure, cloud services, hosted virtual machines and customer web applications
- Handle code deployments in development environments
- Help build cloud-based solutions on Cloud services such as AWS, Microsoft Azure and Google Cloud
- Monitor metrics and develop ways to improve them over time
- Develop automation scripts and solutions for the purposes of streamlining, implementing, and testing the STRATO blockchain platform and enterprise applications
- Strong customer focus, ability to work directly with our partners and customers to help resolve issues or integrate their services with our platform (tier1 customer support)
- Act as first responder for site reliability alerts (OpsGenie) during work time
- Collaborate with engineering, product and QA teams to resolve the problems and help integrate with existing pipelines and workflows
- Keep up with industry best practices and trends

***Trust in Collaboration***
